Data Engineer | Full-Stack Developer

About Me

Information Technology student with full-stack development experience and strong foundations in Data Structures and Algorithms. Skilled in Java, React, Node.js, Express.js, and modern web technologies. I have strong experience in project development, presentations, and outdoor activities, including contributing innovative ideas for upcoming projects. Passionate about building clean, scalable software and eager to contribute as an SDE Intern.

Education

PSG Polytechnic College, Diploma in Information Technology Aug 2022–May 2024

- Percentage: 83.3
- Core Subjects: Data Structures, Operating Systems, Database Management System, Web Technology

Bannari Amman Institute of Technology, BTECH in Information Technology Jul 2024 – Ongoing

- GPA: 6.2
- Relevant Coursework: Data Structures and Algorithms (DSA), OOP (Java), Web Technologies and Frameworks, Operating Systems, DBMS

Technical Experience

Fullstack Training, LitzTech – Coimbatore, TN Sep 2023 – Oct 2023

- Completed a 30-day intensive full-stack development internship focused on real-world projects.
- Built UI components using HTML, CSS, JavaScript, and React.
- Developed a full-stack application with MongoDB/MySQL and complete CRUD operations.
- Gained hands-on experience with debugging, deployment, and Git/GitHub workflows.

Skills & Tools

Programming: Python, JavaScript, C | **Frontend:** React.js, Next.js, HTML, CSS | **Backend:** Node.js, REST APIs | **Databases:** MongoDB, MySQL | **Tools:** Git, GitHub, Selenium | **Problem Solving:** 40+ LeetCode Problems, HackerRank Badges (SQL, Java, C)

Projects

Web Application for Domestic Services (Live) Jun 2025 – Oct 2025

- Full-stack platform for domestic services booking with an interactive dashboard, location features, and Razorpay integration for payment.
- Built authentication and role-based dashboards for Admin, User, and Worker using React.js and Node.js.
- Designed REST APIs and used Git/GitHub for version control and deployed on Vercel and Render.

Web Application for E-Commerce Platform Sep 2025 – Present

- Developed a full-stack e-commerce web application with product listings, category filtering, cart management, and order tracking.
- Implemented secure user authentication, an admin dashboard for product management, and role-based access control using React.js and Node.js.
- Built REST APIs for products, orders, users, and cart operations and managed version control using Git/GitHub.
